

BOOK CUT FINISHES

The special something for book lovers

Book cut finishing **involves adding decorations to the trim of a book block**. Originally, the trim decoration was traditionally done by hand. Nowadays, some of this work can be carried out by machines.

The cut decoration not only has a **positive effect on recognition**, it can also **set impressive accents**. This makes the product stand out from other books and boosts sales.

In addition to the **conventional colour cut and digital colour cut**, which has been popular for some time, CPI now also offers its **latest innovation** in book cut finishing - **the integrated or concealed colour cut "HECTOR"**.

I. Conventional colour cut

In conventional colour cutting, the ink is **applied to the edges of the book using a spray gun**. It can be used to apply **single-colour areas** to the book edges. Individual motifs are not possible.

II. Digital colour cut

The digital colour cut makes it possible to decorate the edges of the book block with **multicolour motifs**. This means that **detailed motifs and embellishments**, right up to the QR code, can be applied to the outer pages of the book block.

III. HECTOR - integrated colour cut

In **HECTOR**, **cut motifs are printed on the edges of the book pages** (integrated into the printing process), which is invisible when leafing through as well as when the book is closed. The **motif becomes visible as soon as the leaves of the book are pressed together and shifted against each other**.

The integrated colour cut **can be combined with conventional or digital colour cut** to create multiple effects simultaneously.

Sample

We will gladly send you a personal sample upon request. A short e-mail with the subject "Sample book cut finishing" is sufficient.

Sample request to:

Nice to know

Colour finishing can now also be depicted via our graphics software eMotion!

At the same time, the data can be prepared for the digital colour cut via eMotion!

You can reach our eMotion team at the following e-mail address:
emotion@cpi-print.de

You can find more information on the technical details and data delivery on our website in the "Service" section. However, we would also be happy to advise you personally.
